

Amendments to the Claims

IN THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims regarding the present application. In reading this, text added by the amendment is underlined, and canceled text appears in ~~strikethrough~~ or [[double brackets]].

- 1 1. (Currently amended) A menu-driven electronic device comprising:
2 a. a display configured to selectively display at least one of a plurality of menus, including
3 a main menu and a sub-menu; and
4 b. a two-dimensional navigation key configured as a single-button including four sets of
5 contact points, wherein the two-dimensional navigation key is configured to select and
6 perform an action corresponding to one of a plurality of main menu items of the main
7 menu and to select and perform an action corresponding to a sub-menu item of the sub-
8 menu associated with a selected main menu item using the four sets of contact points.

- 1 2. (Original) The device according to claim 1, wherein at least a portion of the plurality of main
2 menu items is displayed, and further wherein both the main menu and the sub-menu can be
3 accessed by maintaining contact with the two-dimensional key.

- 1 3. (Original) The device according to claim 1, wherein the device is configured to allow navigation
2 through the plurality of menus by using the two-dimensional navigation key.

- 1 4. (Original) The device according to claim 1, wherein the device is configured to allow navigation
2 through the plurality of menus while maintaining tactile contact with the two-dimensional
3 navigation key.

- 1 5. (Original) The device according to claim 1, wherein the device is configured to allow toggling
2 among at least two control levels by a single access of the two-dimensional navigation key.

- 1 6. (Original) The device according to claim 1, wherein the device is configured to allow toggling
2 between the main menu and one of the plurality of main menu items by using a first direction of

3 the two-dimensional navigation key and to allow toggling between the selected main menu item
4 and the sub-menu associated with the selected main menu item by using a second direction of
5 the two-dimensional navigation key.

1 7. (Original) The device according to claim 1, wherein the device is configured to allow scrolling
2 among at least two control levels by a single access of the two-dimensional navigation key.

1 8. (Original) The device according to claim 1, wherein the device is configured to display the
2 selected main menu item simultaneously with the sub-menu associated with the selected main
3 menu item.

1 9. (Original) The device according to claim 1, wherein the device is configured to display the
2 selected main menu item simultaneously with a plurality of sub-menu items associated with the
3 selected main menu item.

1 10. (Original) The device according to claim 1, wherein the plurality of menus are organized in a
2 menu tree.

1 11. (Original) The device according to claim 1, wherein the main menu further comprises a main
2 menu item icon representing a main menu item.

1 12. (Original) The device according to claim 11, wherein the device is configured to display the
2 main menu item icon to provide a visual reference to an item in the menu tree of the menu being
3 displayed.

1 13. (Original) The device according to claim 12, wherein when the device displays at least a
2 portion of the main menu, the main menu item icon is displayed in a first appearance, and when
3 the device displays the sub-menu, the main menu item icon is displayed in a second appearance
4 different from the first appearance.

1 14. (Original) The device according to claim 13, wherein the first appearance differs from the
2 second appearance by at least one of size, shape, color, highlighting, and pattern.

- 1 15. (Original) The device according to claim 14, wherein when the device displays the sub-menu,
2 the main menu item icon is displayed in a third size different from the first size and the second
3 size.
- 1 16. (Original) The device according to claim 9, wherein the main menu further comprises a non-
2 graphical listing of the plurality of sub-menu items of the sub-menu associated with the selected
3 main menu item.
- 1 17. (Original) The device according to claim 1, wherein the device is a phone.
- 1 18. (Currently amended) A menu-driven wireless telecommunications device comprising:
2 a. a display configured to selectively display at least one of a plurality of menus, including
3 a main menu and a sub-menu; and
4 b. a two-dimensional navigation key configured as a single-button including four sets of
5 contact points, wherein the two-dimensional navigation key is configured to select and
6 perform an action corresponding to one of a plurality of main menu items of the main
7 menu and to select and perform an action corresponding to a sub-menu item of the sub-
8 menu associated with a selected main menu item using the four sets of contact points,
9 wherein the device displays a plurality of sub-menu items.
- 1 19. (Original) The device according to claim 18, wherein when the device displays on the display
2 the sub-menu associated to the selected main menu item, a main menu icon is displayed in the
3 sub-menu to provide a visual reference to the selected main menu item in the menu tree of the
4 menu being displayed.
- 1 20. (Original) The device according to claim 18, wherein the plurality of menus includes a first sub-
2 menu and a second sub-menu, wherein the first sub-menu further comprises a plurality of first
3 sub-menu items and further wherein one of the plurality of first sub-menu items is associated to
4 a second sub-menu.

1 21. (Original) The device according to claim 20, wherein the second sub-menu further comprises a
2 plurality of second sub-menu items.

1 22. (Original) The device according to claim 21, wherein a third orientation of the two-dimensional
2 navigation key is configured to select one of the plurality of second sub-menu items.

1 23. (Currently amended) A menu-driven wireless telecommunications device comprising:
2 a. a display configured to selectively display at least one of a plurality of menus, including
3 a main menu, a first sub-menu, and a second sub-menu; and
4 b. a two-dimensional navigation key configured as a single-button including four sets of
5 contact points, wherein the two-dimensional navigation key is configured to select and
6 perform an action corresponding to one of a plurality of main menu items of the main
7 menu, to select and perform an action corresponding to a first sub-menu item of the first
8 sub-menu associated with a selected main menu item, and further to select and perform
9 an action corresponding to a second sub-menu item of the second sub-menu associated
10 with the selected main menu item using the four sets of contact points.

1 24. (Original) The device according to claim 23, wherein the device is configured to allow scrolling
2 between the main menu and one of the plurality of main menu items by using a first direction of
3 the two-dimensional navigation key, to allow scrolling between the selected main menu item and
4 the first sub-menu associated with the selected main menu item by using a second direction of
5 the two-dimensional navigation key, and further to allow scrolling between the second sub-
6 menu associated with the selected main menu item and a second sub-menu item by using a third
7 direction of the two-dimensional navigation key.

1 25. (Original) The device according to claim 24, wherein the third direction corresponds with the
2 first direction of the two-dimensional navigation key.

- 1 26. (Original) The device according to claim 23, wherein the device is configured to display a main
2 menu item icon to provide a visual reference to an item in a menu tree of the menu being
3 displayed.
